

## TOOLING AND ACCESSORIES

Attractive food products are invariably demanded by retailers and consumers. We provide the Food Processors' with creative design input and tooling expertise to satisfy these requirements.

Our extensive range of accessories can increase the scope of your product depositing and filling, and provide you with the extra benefit of adding an individual finish.

For special applications, we can manufacture ancillary parts for retro-fit. In new projects, these are part of the production equipment build. After almost 30 years in the Food Processing Industry, we understand our customers aspirations.
